Technical Skills

Frontend: JavaScript, React, React Native, Redux, AngularJS, jQuery, HTML, CSS, Bootstrap

Backend: Node.js, MySQL, MongoDB, Mongoose, Knex, Bookshelf, Express

Testing/Deployment/Developer Tools: Jest, Travis CI, Mocha, Chai, Heroku

Other: API, Git, NPM, Yarn, Agile Methodology

Software Engineering Experience

Win-Kel | Software Engineer Intern

Aug 2018 – Present

The Airbnb of storage space

[Website](#)

- Overhauled company's website, redesign, rebuild and relaunch entire framework from scratch via React.
- Implement JS services and handle API routes to allow end users to submit support tickets.
- Optimize the dynamic routing of components via hash-based routing and React Router, delivering a sleek and intuitive experience for end-users.
- Design and build reusable components to increase efficiency and reduce upkeep time.

Projects

PayMe | Full Stack Engineer

[Demo](#) | [Github](#)

A full stack app that help users make informed decisions regarding salary negotiation

Tech Stack: React, Node.js, Express, MySQL, Semantic UI, React Router, Axios, Knex, Bookshelf, Jest

- Implemented user interface's features via React, prioritizing component's modularity, separation of concerns, persistent data storage via user session, and RESTful API.
- Wrote JS services for the frontend codebase to consume REST API, enabling editing, deleting, and updating features for accompanying React components.
- Designed MySQL database schema and server API interfaces.

KitchenTime | Full Stack Engineer

[Github](#)

Grocery-budget planning app that offers user with recommended cooking recipes based on diet

Tech Stack: React, Node.js, MongoDB, Express, Mongoose, HTML5, CSS3, Bootstrap

- Augmented legacy codebase and transitioned from timer-based API calls to user-generated inputs, allowing the end user to have better control of their grocery list submission.

Other Professional Experience

Truex Metier

2015 – 2018

Operations Manager

- Directly oversaw company's transition from Salesforce to Compas CRM, saving the firm over 10% in system spending.
- Customized weekly performance metrics for Founder and Managing Director, resulting in over 25% increase in sales revenue over the course of 6 months.

Education

Hack Reactor - Advanced Software Engineering Program

2018

University of California, Santa Barbara

2015

- B.A. - Major in History, Minor in Asian American Studies
