Software Engineering Experience

IGN | Software Engineer Intern   **Jun 2019 – Aug 2019**
Video Game and Entertainment Media News Company   *Website*
- Redesigned, implemented, and deployed to production a responsive upcoming game page. Queried data via GraphQL on our Postgres database and rendered via React.
- Released a faceoff section for the editorial team -- allowing content producers to release items for end user to vote on. Consumed GraphQL API queries to fetch, create, edit, and render data on our CMS.
- Leveraged ObjectionJS to create custom Postgres schema, models, and queries for faceoff contents.
- Utilized Knex to create custom queries to filter games by genres, platforms, and release date.
- Wrote specific test for queries, models, and schema via Jest for continuous integration.
- Implemented user's comment section for company's mobile application via Flutter.
- Designed algorithms that sorted comments, grouped replies, and hid long comment chains.

Win-Kel | Software Engineer (Contract)   **Aug 2018 – Apr 2019**
The Airbnb of storage space   *Website*
- Overhauled company's frontend application – redesigning, rebuilding, and re-launching via React.
- Developed user submission portal, implemented JavaScript services, and handled API routes to allow end users to submit support tickets and career applications.
- Designed and built reusable components to increase efficiency and reduce upkeep time.
- Implemented frontend with responsiveness and mobile in mind via Bootstrap and CSS.

Technical Skills

Frontend: JavaScript, React, NextJS, Apollo, Flutter, React Native, Redux, AngularJS, jQuery, HTML, CSS
Backend: Node.js, MySQL, Postgres, ObjectionJS, Mongoose, Knex, Express, GraphQL
Testing/Deployment/Developer Tools: Jest, Travis CI, Mocha, Chai, Heroku
Other: API, Git, NPM, Yarn, Agile Methodology

Other Professional Experience

Truex Metier   **2015 – 2018**
Operations Manager
- Directly oversaw company's transition from Salesforce to Compas CRM, saving the firm over 10% in system spending.
- Customized weekly performance metrics for Founder and Managing Director, resulting in over 25% increase in sales revenue over the course of 6 months.

Awards

Placed 1st in IGN's 2019 Internal Hackathon with 70% overall votes for "Most Likely to Generate Revenue" category.

Education

Hack Reactor - Advanced Software Engineering Program   **2018**

University of California, Santa Barbara   **2015**
- *B.A. - Major in History, Minor in Asian American Studies*
  - *Dean's List Spring Quarter 2014, 2015*
